## Testimonial on carbon footprint

a product manufactured by Pruszyński Sp. z o.o. at the factory located in Sokołów (Polska)

We hereby certify

that the amount of greenhouse gas (GHG) emissions caused by Pruszyński Sp. z o.o.,  
in connection with the activities carried out at the factory  
located at Sokolowska 32B Street, 05-806 Sokołów (Poland),  
amounts to **0.135 kg of CO2 equivalent per 1 m<sup>2</sup> of a product.\***

\*GHG emissions result from activities related to the production of corrugated steel sheets and sandwich panels.

The value was determined on the basis of the life cycle analysis (LCA) methodology,  
in accordance with the requirements of EN 15804, and refers to the production phase (A3 module).  
Details regarding to the calculation methodology and the adopted system boundaries can be found  
in Type III Environmental Declarations ITB-EPD no 096-2019, 097-2019 and 098-2019.  
Inventory data used for the LCA calculations refer to the period 01/01/2018 - 31/12/2018.
